SPRINGFIELD,
WYCLIFFE COLLEGE,
STONEHOUSE, GLOS.

9th May, 1923.

To the Air Ministry,
Meteorological Office,
British Rainfall Organization.

Sir,

In reply to your note of May 5th, I may say that I most certainly copied out our full rainfall records and sent these to you at the very beginning of January, at the same time ~~ordering a~~ asking for a copy of Part III of British Rainfall ~~'British Rainfall'~~ and some sheets, etc., for use during this present year. Evidently, however, these returns have gone astray, and I am asking my secretary to copy out the forms again. They ~~shall be~~ are despatched ~~to you in a day or two~~ herewith.

Yours sincerely,

W A Sibly

1923

Dear Sir,

In your return of observations for last year there are discrepancies between the totals for certain months and the sums of the daily entries. These sums are set out below together with the amended total for the year.

I hope that if, by any chance, you do not concur in these amendments you will let me know.

Yours faithfully,

FJW Whipple

AIR MINISTRY.

FORM 1090 METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.

REGISTER OF RAINFALL IN 1925.

Kept at Upper Lode

in the County of Gloucestershire

by

Lat. Long.

Time of Observation

Nearest Railway Station

Diameter of Funnel of Rain Gauge in.

Height of top of Gauge above Ground ft. in.

" " " " Sea Level ft.

Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. An Observer who prefers not to conform to this almost universal rule, should insert the reading at 9 a.m. on January 1st of the following year in the space on the right of this paragraph.

Jan. 1, following.

Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C. 2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Records taken in Millimetres should be entered on Form 1091.

METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.

REGISTER OF RAINFALL IN 1923.

Kept at Thornbury House. Thornbury.
in the County of Gloucestershire
by H. V. Gillett Esq.

Lat. 51° 38' N. Long. 2° 32' W.
Time of Observation 9 a.m.
Nearest Railway Station Thornbury
Diameter of Funnel of Rain Gauge 5 in.
Height of top of Gauge above Ground 2 ft. 1 in.
" " " " Sea Level 110 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C. 2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Jan. 1, following.

Records taken in Millimetres should be entered on Form 1091.

AIR MINISTRY.

FORM 1090 METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.

REGISTER OF RAINFALL IN 1924.

JAN 192

Kept at Kendleshire, Winterbourne
in the County of Gloucester
by James Marsh

Lat. 51½ Long. 2½ W
Time of Observation 8 a.m.
Nearest Railway Station Winterbourne
Diameter of Funnel of Rain Gauge 5 in.
Height of top of Gauge above Ground 1 ft. — in.
" " " " Sea Level 170 ft.

Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. An Observer who prefers not to conform to this almost universal rule, should insert the reading at 9 a.m. on January 1st of the following year in the space on the right of this paragraph.

Jan. 1, following.

Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C. 2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Records taken in Millimetres should be entered on Form 1091.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C. 2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Jan. 1, following.

Records taken in Millimetres should be entered on Form 1091.

A.M. Form 906.

1992

AIR MINISTRY, METEOROLOGICAL OFFICE.

SOUTH KENSINGTON, LONDON, S.W. 7.

QUERY FORM.

On examination of the return of observations made at Sudeley Castle Gardens 1925 the following queries arise by comparison of the readings with the charts, &c. The Director will be obliged if the book containing the original observations may be referred to and this paper returned, with the required information, as soon as possible.

QUERY.	REPLY.
The number of days on which at least .01 inch fell in 1925 as reported by you seems low in comparison with neighbouring stations. Can you please say if the gauge is visited regularly every morning and the contents carefully measured? Sometimes an appreciable amount of water is deposited by dew or fog although rain may not have fallen. 17th June, 1926.	Re Query I beg to state that water is measured when the gauge contains ·01 inch I might mention we are surrounded by hills & its often very foggy & damp on the hills when we are quite clear here & often storms part on approaching the hills & go round either side of us I know just recently there has been rain within 1½ miles & we haven't had a spot, & I notice when we do get rain we often measure more than some near stations.
A slight discrepancy occurs between the total entered for January & the sum of the daily readings. Will you be so good as to make any necessary correction to the enclosed card & return it.	On looking through record book I find the error was made in copying on to card, total correct as was counted in book ·10 inch missed on the 4th of month

AW Pearce – for – Major J.H.D. Brocklehurst.

N.B.—This paper should be folded so as to bring the printed address outside, and returned immediately. Sealing is unnecessary and defaces or causes a gap in the paper, which is to be filed in the Meteorological Office.

For use in M.O. 3.

1. The amendments indicated in red ink are adopted........................
2. Necessary corrections made in Monthly Return........................
3. " " " " Weekly (Form 3110)........................

FORM 1090

AIR MINISTRY.

METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.

REGISTER OF RAINFALL IN 1924

9 MAR 1925

Kept at Temple Guiting Ho, Winchcombe
in the County of Gloucester
by Major C Stacey

Lat. Long.
Time of Observation 10. am
Nearest Railway Station Toddington GWR
Diameter of Funnel of Rain Gauge 4 in.
Height of top of Gauge above Ground - ft. 10 in.
" " " " Sea Level 700 ft.

Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. An Observer who prefers not to conform to this almost universal rule, should insert the reading at 9 a.m. on January 1st of the following year in the space on the right of this paragraph.

Jan. 1, following. 0·270

Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C. 2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Records taken in Millimetres should be entered on Form 1091.

A.M. Form 906.

AIR MINISTRY, METEOROLOGICAL OFFICE.

SOUTH KENSINGTON, LONDON, S.W. 7.

QUERY FORM.

On examination of the return of observations made at Temple Guiting, Nr. CHELTENHAM 1925 the following queries arise by comparison of the readings with the charts, &c. The Director will be obliged if the book containing the original observations may be referred to and this paper returned, with the required information, as soon as possible.

QUERY.	REPLY.
The following corrections to the monthly sums of the daily totals of rainfall for 1925 are notified in case there may have been some error in entering the daily amounts :- January 3.31 instead of 1.91 February 4.51 " " 4.54 April 2.44 " " 2.495 May 4.18 " " 4.28 September 4.37 " " 4.30 November 1.915 " " 1.955 December 3.65 " " 3.60 17th June, 1926.	It is just possible that some clerical errors have arisen on my return which, if this is the case, are regretted. If you will be good enough to send me another Blank form Section A. Form 1090 I shall have the pleasure to send you a fresh return copied from my Observation Book, which I have reason to believe has been accurately kept for 24 years. ✓ Sent 23 June 20th June 1926 Major Retired.

N.B.—This paper should be folded so as to bring the printed address outside, and returned immediately. Sealing is unnecessary and defaces or causes a gap in the paper, which is to be filed in the Meteorological Office.

For use in M.O. 3.

1. The amendments indicated in red ink are adopted.............................
2. Necessary corrections made in Monthly Return.............................
3. " " " " Weekly (Form 3110).............................

For use in M.O. 2.

4. Necessary corrections noted in Forecast Division ....

FORM A. 1. METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.

REGISTER OF RAINFALL IN 1921.

Kept at Witcombe Reservoirs

in the County of Gloucester

by E.W.A. Carter
City Surveyor, Gloucester

Lat. Long.
Time of Observation 9 am
Nearest Railway Station Gloucester
Diameter of Funnel of Rain Gauge 8 in.
Height of top of Gauge above Ground 3 ft. in.
" " " " Sea Level 297 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, 62, Camden Square, London, N.W. 1.

Jan. 1, following.

Records taken in Millimetres should not be entered on this form.

Wrote obs. ref. exposure 23.6.26
f. 699333/26.

FOR OFFICIAL USE.

AIR MINISTRY.

FORM 1090. METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.

1956

Name see 1922 rec

Register of Rainfall in 1925.

Kept at "CLAREMONT," WOTTON-UNDER-EDGE

in the County of GLOUCESTER

Diameter of Funnel of Gauge — 5 in.
Height of top of Gauge above Ground ft. 6 in.
" Ground " Sea Level 350 ft.

Observers are requested to read the instructions printed overleaf before filling in this form.

Every Observer should fill in section C overleaf.

THE MORNING MEASUREMENT IS CREDITED TO THE PREVIOUS DAY.

An observer who does not conform to this rule should insert the reading made on January 1st of the following year in the space on the right of this paragraph.

Records taken in Millimetres should be entered on Form 1091.

Jan. 1, following.

D INSTRUCTIONS.

1. Advice as to the selection of the site for a raingauge, particulars of the gauge recommended for use and other information is given in "Rules for Rainfall Observers," to be obtained from The Director, Meteorological Office, Air Ministry, London, W.C. 2, or from The Superintendent, Meteorological Office, 6, Drumsheugh Gardens, Edinburgh.

2. In filling up the register on the reverse side the following rules should be observed. Those rules which apply also to the summary form above are printed in *italic type :—*

(a) *Rain should be measured each morning, preferably at 9 a.m., Greenwich Mean Time. The measurement is to be credited to the previous day and should be entered in the register at the time of observation. Thus the entry for January 1st is the rainfall for the 24 hours following 9 a.m. on January 1st; it is therefore the amount measured on January 2nd.*

(b) *The raingauge should be visited every morning without exception.* When there has been no precipitation the entry in the register should be a dash — (not ·00). The entry "trace" or "tr" is to be made in the two following cases, (A) and (B).

(A) When there is less than ·005 in. of water in the gauge and the observer knows that this is not the result of a drop or two draining from the sides of the can after emptying the rainwater out of it at a previous time of observation, i.e., the observer must be reasonably certain that there has actually been precipitation since the preceding measurement. If the observer knows that the precipitation has been in the form of dew or wet fog this may be noted.

(B) The observer knows definitely from his own observation that some rain (or other form of precipitation such as snow, hail, sleet or drizzle) has fallen since the preceding observation, and yet finds no water in the gauge. This happens sometimes especially in dry, warm weather, without the gauge being even damp, the small amount of rain having evaporated before it got into the receiving can.

(c) *On some measures there is graduation marked ·005; this graduation is to show the limit between the amounts which count as ·01 and those which are mere "traces."* An entry ·005 is not to be made in the register.

(d) If the morning observation has to be omitted for one day or more, the days covered by the next reading should be indicated by a bracket. Thus $\left.\begin{matrix}17\\18\end{matrix}\right\}\cdot 14$ would show that the reading on the morning of the 18th day of the month was missed and that the reading on the morning of the 19th was ·14 in.

(e) *The total rainfall for the month is found by addition. The addition should always be done a second time as a check.* The check is of special importance when the total has already been found in another copy of the register.

(f) *The "total number of days with ·01 in. or more" includes all the days with any rain except those for which the entry is "trace."*

(g) If observations are not available for every day during the month the spaces for the number of days with rain should be left blank.

(h) The heaviest daily fall for each month should be underlined.
